crop update

Clanton Farms

Hermitage, Arkansas

Less than a week until the first harvest of Arkansas vine ripe tomatoes!

As you can see in the pictures the fruit is sizing up nicely on all varieties.

We need to wait for them to mature and begin to break color to achieve the full experience of the vine ripe. We are planning on going into the fields for our first small harvest next Thursday/Friday. We expect volume to pick up quickly starting early the week of the 16th and being in full production for your 4th of July ads!
